

SPORTS AND RECREATION

Arena Manawatu, Palmerston North

This is an extension to a project, designed originally in 1980 by DEA, to cater for modern public and corporate viewing of International netball and other indoor sporting events.

Conceptually the form takes a piece of the original curved form and “pulls” it away to provide space both at ground level for the public and at first floor level overlooking the main sports arena for corporate facilities.

Completed to tight time frames to suit an International Netball Test and to a very tight budget, this project has received acclaim from both client and users.
